

For the 2022/2023 CPD Diary Year, while the Federation understands that physicians are still working very hard, a return towards normal levels of CPD is advised. It is therefore recommended that physicians should endeavour to get close to or achieve the usual CPD requirements (an annual total of 50 credits, 25 of which should be external).

The other changes that were implemented during the pandemic and outlined in the section for the diary year 2021/22 remain in place.
