MRCP(UK) and Specialty Certificate Examinations

Pass Rates by Gender and Ethnicity – 2012

Information about all the MRCP(UK) and Specialty Certificate Examination pass rates are updated on our website (www.mrcpuk.org) shortly after each exam has taken place. This sets out data about the proportions of key groups of candidates (UK graduates etc) who are passing our exams, and is published with the intention of giving candidates important feedback, and in the interests of openness and transparency. The MRCP(UK) Management Board agreed in 2011 that an annual report setting out the pass rates for candidates of all our exams according to their gender and ethnicity should be publicly available.

The MRCP(UK) Management Board has closely monitored ethnicity and gender rates for a number of years, and contributed data to a systematic review and meta-analysis of ethnicity and academic performance in UK-trained doctors and medical students published in March 2011. This was co-authored by Professor Chris McManus, an Educational Advisor to the MRCP(UK), and is available at <http://www.bmj.com/content/342/bmj.d901>. The paper concludes that UK trained doctors and medical students from minority ethnic groups tend to underperform academically compared with their white counterparts, but that it is not clear why this might be. The paper demonstrates that the differences in performance are consistent across medical schools, exam types, and undergraduate and postgraduate assessments, and has persisted for at least the past three decades.

The MRCP(UK) has previously published its own paper analysing examination pass rates by the ethnicity and gender of UK graduates in 2003-2004, (which is available at: <http://www.biomedcentral.com/1741-7015/5/8>) and the same reporting categories has been used for this 2012 report to maintain consistency.

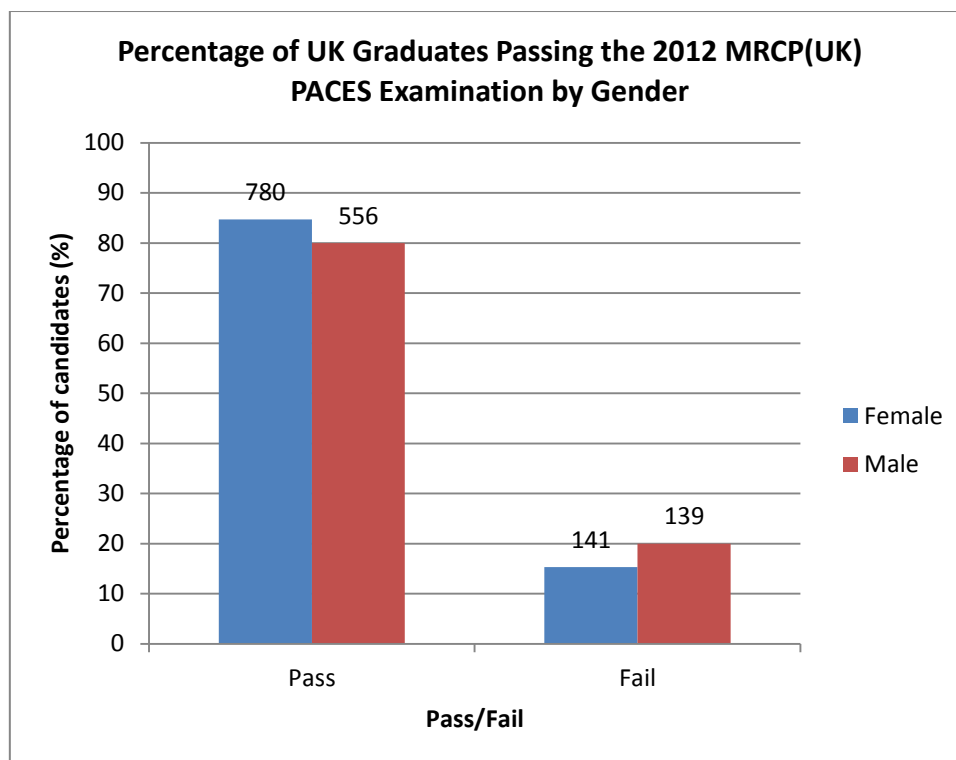

The graphs on the following pages show the percentage of passing candidates by gender and ethnicity for UK and International graduates for all three parts of the MRCP (UK) and the Specialty Certificate Examinations during 2012.

Please note: The gender and ethnicity data provided and displayed in these graphs is self-declared by candidates.

In addition to the percentage pass rates, the graphs also display the total number of candidates making up each group. For example, in the first graph 961 female UK graduates passed the MRCP(UK) Part 1 examination in 2012.

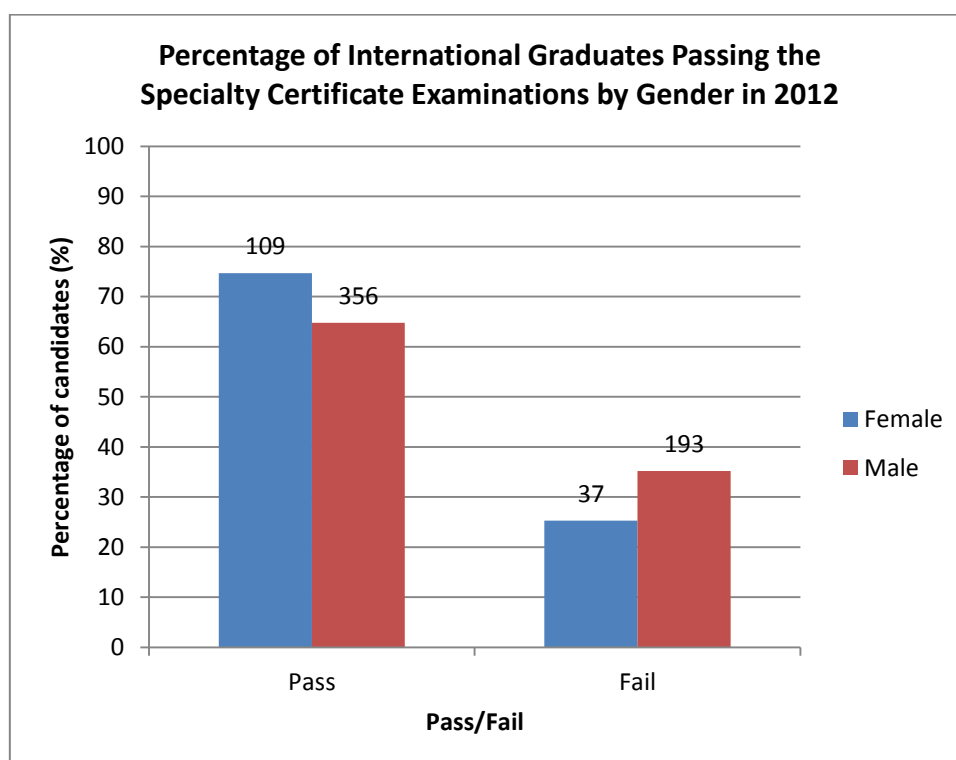

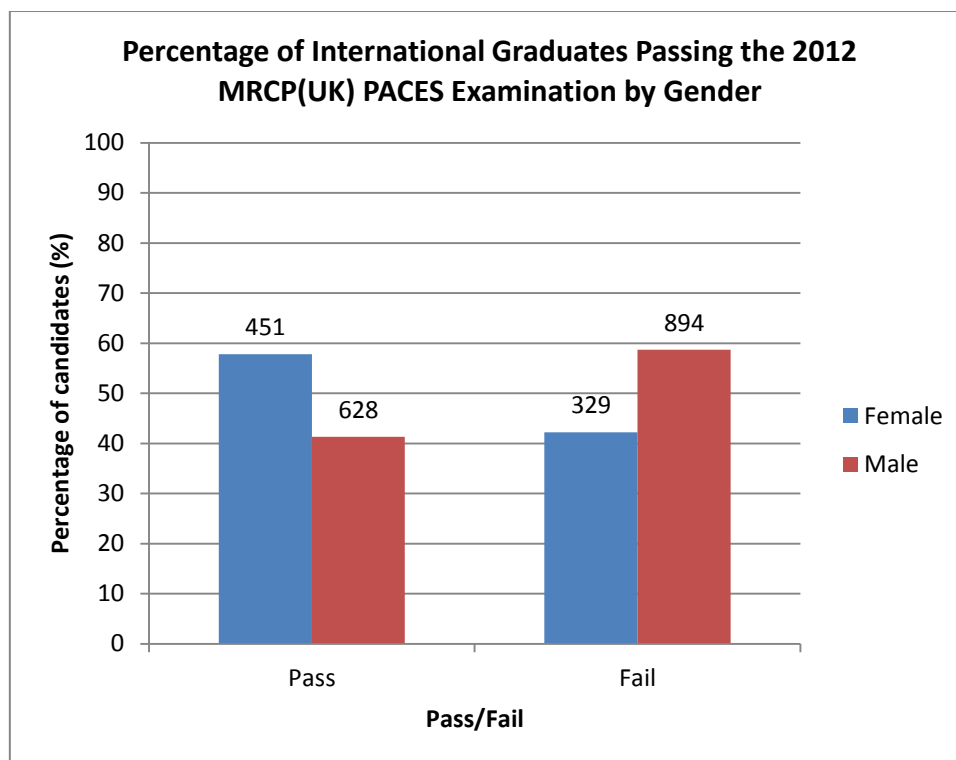

- A) The percentage of male and female UK graduates passing the MRCP(UK) Part 1, Part 2, PACES and the Specialty Certificate Examinations:

- B) The percentage of male and female International graduates passing the MRCP(UK) Part 1, Part 2, PACES and the Specialty Certificate Examinations:

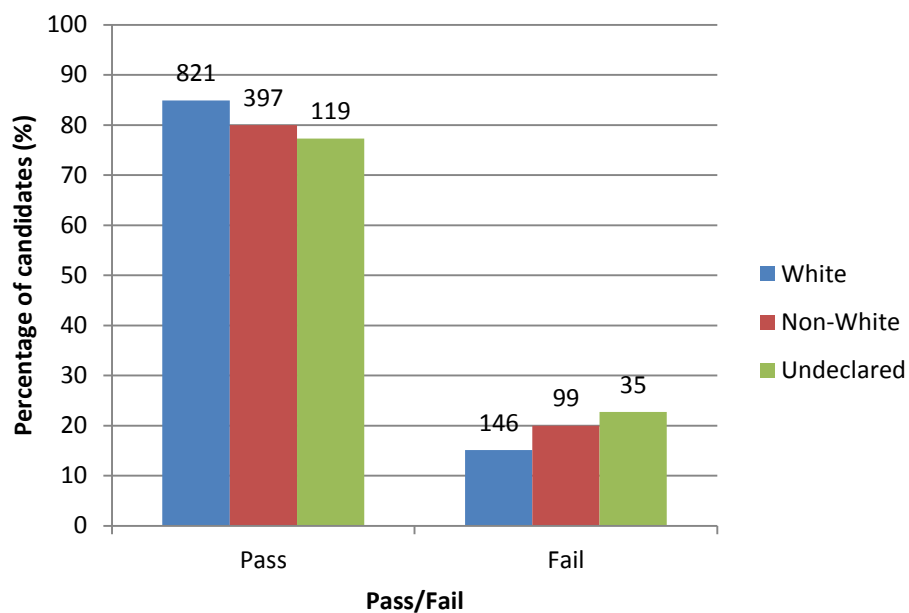

- C) The percentage of UK graduates passing the MRCP(UK) Part 1, Part 2, PACES and the Specialty Certificate Examinations by ethnicity (defined as White [inclusive of white-British, white-Irish and white-other] and Non-White).

**Percentage of UK Graduates Passing the 2012 MRCP(UK)
PACES Examination by Ethnicity**

**Percentage of UK Graduates Passing the Specialty
Certificate Examinations by Ethnicity in 2012**

- D) The percentage of International graduates passing the MRCP(UK) Part 1, Part 2, PACES and the Specialty Certificate Examinations by ethnicity (defined as White [inclusive of white-British, white-Irish and white-other] and Non-White).

**Percentage of International Graduates Passing the 2012
MRCP(UK) PACES Examination by Ethnicity**

**Percentage of International Graduates Passing the
Specialty Certificate Examinations by Ethnicity in 2012**
